#### Address

Thu Duc, Ho Chi Minh City,  
Viet Nam

## Short Profile

I am a motivated person who is good at learning new things on my own. I use clear and logical thinking to find solutions and solve problems effectively. I always take full responsibility for my work and can manage my tasks well. I enjoy working with a team but can also complete tasks on my own. I always look for ways to improve and actively learn new things.

## Education

### Posts and Telecommunications Institute of Technology (PTIT), Ho Chi Minh City

- **Bachelor of Science (B.S.) in Information Technology**
- **Time:** October 2022 – Present
- **GPA:** 3.48/4.00
- **Achievements:**
  - 3x Semester Scholarships

## Skills

- **Game Engines & Libraries:**
  - Unity.
- **Programming Languages:**
  - C#, Java.
- **Tools & Workflow:**
  - Git/GitHub, VS Code, AI-Assisted Development (Gemini, Antigravity, Claude).
- **Languages:**
  - English (TOEIC L&R 910/990).

## Work Experience

### Wolffun Game – Intern Unity Developer

#### Cube Blast (4/2026 - 5/2026) - Casual Mobile Game

- **Technologies:** Unity, C#, Firebase, DOTween.
- **Core Contributions:**
  - Acted as primary gameplay programmer, owning core gameplay mechanics, brick/crate systems, and live-ops economy features for a commercial title.
  - Engineered a physics-based aiming system with real-time trajectory previews via raycasts against polygon colliders under a perspective camera.
  - Developed multiple booster systems, custom UI/VFX animations via DOTween, and a staged tutorial for user onboarding.
  - Optimized mobile performance using strict Object Pooling for bullets/floating text and integrated analytics tracking (ad impressions, booster usage).

## Projects

### Crimson Arena (12-2025 - Present) - Roguelite Game

- **Technologies:** Unity, C#.
- **Core Contributions:**
  - Developed and owned the entire core gameplay loop, implementing diverse character mechanics, combat systems, and twin-stick shooting controls.
  - Engineered a scalable progression system using ScriptableObjects and a central GameManager to manage WaveData, Level-Ups, and Boss transitions.
  - Optimized game loop performance via strict Object Pooling for high-frequency elements (projectiles, enemies, XP drops) to ensure smooth 60 FPS.
- **GitHub:** <https://github.com/tanvmt/crimson-arena>

### SELF: Under the Smile (Global Game Jam 2026) - Narrative Game

- **Technologies:** Unity, C#.
- **Core Contributions:**
  - Programmed a dynamic cryptogram puzzle system with real-time text validation, visual text effects, and interactive UI feedback.
  - Engineered a branching narrative state machine where decoded sentences unlock player decisions, directly steering multiple ending paths.
- **GitHub:** <https://github.com/vudkhoa/GlobalGameJam2026>
